

Ewing Morris Opportunities Fund LP (the "Fund") was established by John Ewing and Darcy Morris in September 2011 to achieve preservation and growth of capital through superior securities selection. The Fund invests in securities that are inefficiently priced based on a number of factors. The Fund is focused on North American-based small-capitalization companies.

STRATEGY

We describe our investment strategy using the analogy of a sport's playbook. A team with only one play can often be stopped but a championship team will have perfected multiple plays so that they can score regardless of the opposition's strategy.

RISK

We view risk as the chance of permanent capital loss and believe that volatility represents a source of opportunity. We invest when security prices are trading at a significant discount to our estimate of true value. This is designed to provide a margin of safety to protect capital against unexpected events such as economic crises, natural disasters, political events and new technologies. Our goal is to protect and grow our clients' purchasing power over time.

FOUR DIFFERENT INVESTMENT PLAYS:

- 1) **Great Businesses** – businesses that are highly profitable, have a sustainable competitive advantage and one or more terrific growth opportunities;
- 2) **Great Capital Allocators** – businesses run by CEOs with a superior ability to allocate profits to attractive reinvestment opportunities;
- 3) **Cheap Assets** – businesses that are selling for less than the value of their assets; and
- 4) **Broken Businesses** – we will short businesses with a high probability of failure.
